

## NVQ Level 2 Site Logistics Operation - Performance Management

---

The NVQ is designed for construction personnel who are involved in working with logistics on any construction site.

To achieve the full award, candidates will need to successfully complete 3 mandatory core units plus 3 general option or 3 plant options units as shown below:

### Mandatory units

- Contribute to an efficient and effective work environment
- Contribute to health and safety in the workplace
- Operate powered tools and equipment for routine and predictable requirements

### General options (choose 3)

- Prepare resources and segregate the area for highway works
- Provide for and maintain the security of the work and the surrounding environment
- Erect and dismantle basic working platforms
- Operate and control powered plant and machinery
- Control vehicular traffic in and around construction sites
- Carry out slinging and signalling for the movement of loads

Or

### Plant options (choose 3)

- Prepare resources and segregate the area for highway works
- Operate and control powered plant and machinery
- Operate specialised plant and machinery to performance requirements (lifting and transferring)
- Carry out slinging and signalling for the movement of loads
- Lift, transfer and position loads
- Set up and utilise powered access equipment
