

Working at Heights and the Requirements of PPE

Duration: 1 Day

This workshop will firstly identify what the term “work at height” really means and will go on to outline the basic requirements of the Work at Height Regulations 2005 and the attached schedules. You will then discuss the basic strategies for dealing with the duties placed upon all who are involved in working at heights.

We will identify what is and isn’t Personal Protective Equipment. We will then look at the duties of the employer and employee including what can or cannot legally be charged for by the employer and the employees responsibilities to take care of the equipment.
